A trusted execution partner for mission-critical building infrastructure.

OUR STORY

Mallick Enterprises is a Mumbai-based contracting firm that has grown from a specialist plumbing contractor into a broader turnkey execution partner serving residential towers, townships, commercial assets, clubhouses, IT parks and interior fit-outs.

The business is led by Alkash Mallick and has built long-term relationships with respected developers by combining craftsmanship, disciplined site management, safety-first practices and dependable delivery. The company's flagship plumbing capability today sits within an integrated execution portfolio spanning water treatment, sewage treatment, civil works, fire protection and external development.

“ Trust and satisfaction of our clients is our motto.

— Alkash Mallick, Proprietor

6

Integrated service
disciplines

Six disciplines. One accountable contractor.

Mallick Enterprises gives builders a single execution partner instead of multiple fragmented vendors, reducing coordination complexity and helping projects move with tighter control over quality, sequencing and handover.

01

Plumbing

Internal, external, concealed and terrace plumbing, drainage systems, sanitary installations and fit-out works.

02

Water Treatment Plants (WTP)

Turnkey filtration, softening, RO, disinfection, mechanical and electrical packages with commissioning.

03

Sewage Treatment Plants (STP)

Treatment and reuse systems sized to project sewage load to support compliance and water reuse.

04

Civil Engineering

RCC, block-work, waterproofing, plastering, finishing packages and site development coordinated with MEP.

05

Fire Fighting

Wet-riser, hydrant, sprinkler and pump-room systems aligned with NBC and local fire-brigade norms.

06

External Development

Internal roads, storm-water drainage, external water/sewer networks, landscaping plumbing and utility ducting.

Service mix can be customised project-wise for residential, mixed-use, commercial and interior fit-out assignments.

Plumbing excellence at execution scale.

Plumbing remains the company's core strength, with execution capability across high-rise residential, townships, clubhouses and interior fit-outs. The team covers the complete cycle—from concealed supply lines and sanitary fixtures to external sewer networks and handover support.

Bathroom & Sanitary Fittings

Precision installation of premium sanitaryware for residential and commercial washrooms.

Concealed Plumbing Systems

In-wall CPVC and PEX systems engineered for leak-free performance and clean finishes.

Terrace Looping & Water Supply

Overhead tank interconnections, ring mains and pressure-balanced supply lines.

Drainage & Sewage Installation

Gravity drainage, soil stacks, vent lines and STP tie-ins built to municipal code.

External Plumbing — Townships & High-Rises

Site-wide external water, storm and sewer networks for townships and G+30 towers.

Interior Fit-Out Plumbing

Clubhouses, experience centers and offices coordinated with architects and MEP teams.

Where clients see the difference

- ✓ Experienced teams familiar with high-rise execution constraints
- ✓ Coordination with civil, architectural and MEP stakeholders
- ✓ Pressure testing and documented quality checks
- ✓ Clean handover with snag closure support
- ✓ Capability across internal, external and concealed systems

Turnkey capability beyond plumbing.

Water Treatment Plants (WTP)

Filtration, softening, RO, chlorination, UV disinfection, mechanical & electrical package, commissioning & handover.

Sewage Treatment Plants (STP)

Project-load sizing, treated-water reuse, MPCB-aligned design intent, support for green-building targets.

Civil Engineering

RCC & structural works, waterproofing, plastering, block-work, finishes and overall site coordination.

Fire Fighting

Wet-riser, hydrant, sprinkler network design, fire pump-room systems, compliance-oriented execution.

External Development

Internal roads, paving, storm-water networks, external water/sewer mains, landscape plumbing & utility ducting.

Single-window accountability

Plumbing

WTP

STP

Civil

Fire Fighting

External Development

A unified contractor structure helps owners and project managers coordinate faster, reduce interface gaps and maintain schedule discipline across multiple work packages.

Why leading builders choose Mallick Enterprises.

Two-Decade Track Record

25+ years of continuous work with reputed developers across India.

Skilled Craftsmanship

Trained teams working with modern tools, methods and quality-conscious execution.

Site Discipline & Safety

PPE-mandatory sites, toolbox talks and documented safety practices.

High-Rise Delivery Experience

Comfort across mid-rise, high-rise and podium typology projects.

Dedicated Coordination

Working closely with architects, MEP consultants and civil contractors.

Reliable Handover Support

Focus on QA closure, snag rectification and project completion confidence.

How we work

A milestone-based delivery model designed to align seamlessly with the builder's civil and interior programme.

01

Site Assessment & Consultation

Walk-through, drawings review and feasibility inputs.

02

Layout & Quotation

Detailed layout, BoQ and commercial submission.

03

Material & Deployment

Vetted material procurement and skilled crew mobilisation.

04

Execution & QA

Milestone execution with pressure tests and documented checks.

05

Handover & Support

Snag-free handover with post-completion support during DLP.

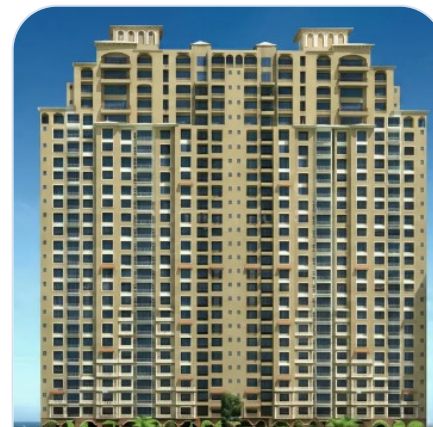

Delivered for India's leading developers.
